SKILLS

Proficient in **Java, Spring Boot, ReactJS, HTML, CSS, Linux, Shell scripting and SQL.**

Strong understanding of the **FIX protocol**

Experience with Order Routing System(**ORS**) and their role in trade execution and management.

Exposure in troubleshooting and incident management within time-sensitive trading environment.

Familiarity with Git for managing code changes and deployments.

Good documentation skills, including technical documentation and support procedures.

Collaborative team player, adept at working with cross-functional teams to achieve common goals.

INTERESTS

Gym workouts, Chess, Football

CERTIFICATION

AWS Certified Solutions Architect - Associate, 2023

OBJECTIVE

Passionate about leveraging my technical skills in Java, Spring Boot, ReactJS, MySQL, Linux, and Shellscripts within a dynamic and innovative environment. Seeking a developer role to leverage my expertise in building scalable applications and improving performance in complex systems.

EXPERIENCE

*Dec-2021
- Present*

System Engineer Tata Consultancy Services

Provided production support for Singapore Exchange, handling various incident types.

Developed and implemented Shell scripts to automate tasks, reducing manual intervention and increasing operational efficiency.

Analyzed and managed incidents, problems, and client requests efficiently.

Monitored application processes to ensure stability and optimal performance.

Identified root causes of bugs and contributed to development requirements.

Worked across Member Test, Production, and UAT environments to streamline support and deployment processes.

Prepared and maintained support documentation to enhance team efficiency.

EDUCATION

*2016-
2020*

Bachelor of Technology in Computer Science
Guru Jambheshwar University

PERSONAL PROJECTS

Employee management system

Developed an Employee Management application using Spring Boot, React JS, and MySQL, implementing CRUD operations and JWT authentication for secure user management.

BookManager

Developed BookManager using Spring Boot, ReactJS, and MySQL, incorporating features for adding, updating, deleting, and borrowing books with JWT authentication and role-based access control for secure user management.
